Drifting silently down
a mountain pass or easing through
a small country town, many people are discovering
the pleasures of bicycle touring.
Every week a large number of newspapers are
discussing bicycle paths, bicycling
programs, and bicycle trips. Universities, shopping
centers, and office buildings are sprouting bicycle racks
for the concerned urban commuter who has rediscovered the bicycle.
More and more couples are coming home from vacations
without gasoline bills; whole families are discovering a new world
of weekend enjoyment. Bicycle touring is coming
of age in America. As the focus of attention
turns more toward energy, air quality, and health problems,
bicycling becomes an even more important
and enjoyable answer to our recreational
and transportation needs. Packs by KIRTLAND/TOURPAK are
designed with the bicycle tourer in mind
offering the best in function,
design, and materials at reasonable prices
to give years of touring
enjoyment.

Quality packs for the serious touring enthusiast.

Bicycle touring and camping present unique problems to the outdoor enthusiast. Where hikers carry their equipment on their backs, bicycle tourers carry these items on their bicycle.

The bicyclist needs room for all his equipment and personal items, yet the load must be light and evenly distributed for pedaling ease, balance and safety. Additionally, many bicycle tourers travel hundreds or thousands of miles via air or rail to reach their general touring area. The equipment which they carry must be compact, durable and easily handled in such situations. KIRTLAND/TOURPAK meets these requirements. Panniers and handlebar bags are designed with the tourer foremost in mind. The panniers snap together for carrying ease. The handlebar bag doubles as a handbag when used with the shoulder strap.

Both touring items feature durable 8 ounce urethane-coated nylon pack cloth, heavy covered YKK zippers, 3-ply thread and double sewn seams at points of high stress, nickel or zinc-plated hardware, top grain, chromed leather. Maximum convenience is assured with the carrying handles or straps, map pockets and easy reach side pockets for small personal or lunch items. KIRTLAND/TOURPAK has done it all.

Convenience, durability, ease of transport and balance.

The finest panniers and handlebar bags available.

PANNIERS

These panniers can be mounted on or detached from any standard rear carrier in less than 30 seconds. Unique K/T Twin Spring Suspension System allows the panniers to hook on the edge of the carrier, leaving carrier top free for other items. High strength aluminum stiffeners and unique horizontal placement of the springs assures a securely riding pannier. Eight pockets and two map slots provide easy access to small items. The panniers snap together when not on the bicycle to be used as luggage when travelling to and from a tour, and for convenience in carrying into and out of hostels, hotels and motels.

2050 cu. in., 38 ozs.

Colors: Navy Blue, Bright Red.

HANDLEBAR BAG

The matching handlebar bag has six pockets and a clear vinyl waterproof map enclosure. These allow the rider instant access to his camera, snacks, passport, etc., and a constant view of his map while riding. A combination of two aluminum stiffeners and three fasteners assures a securely riding bag.

A shoulder strap is included with the handlebar bag allowing it to be used as a handbag when the tourer leaves his bike.

680 cu. in., 20 ozs.

Colors: Navy Blue, Bright Red.

KIRTLAND/TOURPAK recommends using the K/T Handlebar Bag with the E-Z ON, E-Z OFF Front Bag Support. Although the handlebar bag can be used with a variety of front carriers, it is most compatible with the E-Z ON, E-Z OFF model. Your dealer should have this front bag support available.

KIRTLAND/TOURPAK uses only the finest materials available.

FABRIC: Waterproof 8 oz. urethane coated nylon duck for durability and light weight.

LEATHER: Chrome-tanned full grain for strength and abrasion resistance.

HARDWARE: Rustproof finish for long lasting appearance.

TAPE: High grade nylon for strength, abrasion resistance, and long life.

THREAD: Nylon for high strength seam construction. Double sewn at points of high stress.

ZIPPERS: Self-repairing; nylon for smoothness of operation and long life. Generous zipper flaps provide waterproofing.

ALUMINUM STIFFENERS: 6061-T6 for high strength and resiliency.
